## PROFESSIONAL SUMMARY

Biomedical Engineering graduate from Yıldız Technical University with internship experience in hospital biomedical engineering, orthopedic technologies, and medical device management.

Passionate about field service engineering, clinical applications, quality systems, and medical technologies. Strong analytical, research, and problem-solving skills with hands-on laboratory experience in biomaterials, medical devices, and calibration-related processes.

Seeking an opportunity to contribute to a global medical technology company.

## EDUCATION

Yıldız Technical University

B.Sc. in Biomedical Engineering

2020 – 2026

Anadolu University

Associate degree in Web Design and Coding

2020 – 2024

## INTERNSHIP EXPERIENCE

### SANKO Hospital 01.2024-02.2024

Biomedical Engineering Intern

- Participated in the maintenance and calibration processes of medical devices.
- Observed troubleshooting and repair procedures alongside the biomedical technical service team.
- Gained experience in hospital medical device management and inventory systems.

### Ottoman Orthopedics 01.2025-01.2025

Biomedical Engineering Intern

- Observed orthosis and prosthesis manufacturing processes.
- Assisted in patient-specific technical applications.

### TUGA Medical Devices

Biomedical Engineering Intern

- Assist in maintenance and technical service of medical devices.
- Support installation and troubleshooting activities.
- Gain hands-on experience with hospital equipment and biomedical systems.

### Yıldız Technical University – Biomaterials and Tissue Engineering Laboratory

Research Intern

- Assisted in biomaterials synthesis and tissue engineering research
- Performed material characterization and experimental data collection.
- Supported research on regenerative medicine and biomedical engineering.

## CERTIFICATES & TRAINING

- TS EN ISO/IEC 17025:2017 Basic Training – Turkish Standards Institution (TSE), 2026
- Project Management, Risk Management and Change Management – Yıldız Technical University
- Medical Device Regulatory Training — KaliteKit, 2026  
EU MDR 2017/745, ÜTS, UDI, technical documentation, GSPR and medical device risk management
- EUDAMED Actor and Device Registration Training — KaliteKit, 2026  
Actor Registration, SRN, Basic UDI-DI, UDI-DI, EMDN and EUDAMED actor/device registration processes

---

## RESEARCH EXPERIENCE

- Graduation Thesis: *Hydrogel-Based Composite Scaffolds with Natural Polysaccharides and Hydroxyapatite for Jawbone Regeneration* – Biomaterial synthesis, freeze-drying, SEM, FTIR, mechanical characterization. Manuscript in preparation.
- TÜBİTAK Research Project: *Nanocurcumin and Melanin Interaction Under UVB-Induced Oxidative Stress in Vitiligo* – Literature review, cell culture, ROS analysis, Melan-a cell line.
- Machine Learning Project: *Brain Tumor MRI Classification* – Python, TensorFlow, Keras, MobileNetV2 (85.1% accuracy).
